INCIDENT Weather Forecast

FORECAST NO: 2 NAME OF FIRE: Beckwourth Complex

PREDICTION FOR: Thu 0600 – Fri 0600 UNIT: Plumas National Forest

SHIFT DATE: July 8-9, 2021 Incident Meteorologist: Dan Harty

FORECAST ISSUED: 1900, July 7, 2021

Dan Horty

... Stronger Wind Gusts this Afternoon/Evening...

<u>WEATHER DISCUSSION:</u> A disturbance passing over the Pacific Northwest will bring increased winds today. Sunny skies will prevail with temperatures remaining a few degrees above normal. Little change in humidity is expected with poor to moderate recovery to start the day followed by low afternoon humidity.

WEATHER FORECAST for THURSDAY:

Weather around fire area

WEATHER: Sunny. Areas of smoke.

TEMPERATURES: Valleys/Lower Slopes: 88-92° Upper Slopes/Ridges: 84-88°

HUMIDITY: 9-15% HAINES INDEX: 5

20 FT WINDS:

RIDGETOP - Southwest 15-20 mph. Gusts to around 30 mph.

SLOPE/VALLEY - Upslope/upvalley 4-8 mph in the morning, becoming west southwest 12-20 mph

with gusts around 30 mph in the afternoon.

STABILITY/INVERSION: Moderate stability in the morning, inversion around 6000', lifting late morning.

WEATHER FORECAST for THURSDAY NIGHT:

WEATHER: Areas of smoke, otherwise clear.

TEMPERATURES: Valleys/Lower Slopes: 48-53° Upper Slopes/Ridges: 53-58°

(Warmest along mid-slopes in thermal belt)

HUMIDITY: Valleys/Lower Slopes: 35-45% Upper Slopes/Ridges: 25-35%

(Lowest along mid-slopes in thermal belt)

20 FT WINDS:

RIDGETOP - Southwest 15-20 mph with gusts around 30 mph in the early evening, decreasing after sunset to southwest 8-12 mph.

SLOPE/VALLEY - West southwest 12-20 mph with gusts near 30 mph in the early evening diminishing after sunset and transitioning to downslope/downvalley 2-6 mph.

STABILITY/INVERSION: Becoming more stable overnight with inversion developing after midnight.

<u>OUTLOOK for Friday through Sunday:</u> A strong area of high pressure over the Four Corners region will strengthen and build west over California, bringing well above normal temperatures. **Excessive Heat Watch** remains in effect for the fire area Saturday through Monday. Relative humidity will remain low with poor to moderate overnight recovery. The high pressure will decrease afternoon winds with light, terrain influenced wind overnight into the mornings then becoming breezy in the afternoon and evening.

HAVIOR FORECAST
TYPE OF FIRE Wildfire
OPERATIONAL PERIOD 07/08-07/09 Day/Might
TIME ISSUED 1830
SIGNED Diondray Wiley, FBAN (T)

INPUTS

WEATHER SUMMARY

WEATHER: Sunny skies. Temperatures will remain a few degrees above normal. Little change in RH. Poor overnight recoveries. Slight increase in wind speed. Areas of smoke.

MAX TEMP: Mid Slope: 84-88° Valleys: 88-92°

Humidity 9-15%

20 FOOT WINDS: Valleys/Slope: upslope 4-8 mph becoming WSW 12-20 mph G30 mph in the afternoon.

Ridge Top: SW 15-20 mph Gusts to near 30 mph.

LAL: 0 HAINES INDEX 5 CHANCE OF WETTING RAIN: 0%

FUELS: The major fuel types, found in and around the fire area are timber understory and brush. **Ignition Receptiveness:** ERC levels are below the 90th percentile. **Probability of Ignition** 90-100% **Dryness:** Dead and down fuel moistures: 1 hour – 2% **10 hour–3 %,** 100 hour–5 %, and 1000 hour– 7%.

FIRE BEHAVIOR

Expect very active fire behavior in Branch I due to sustained SW winds and receptive fuels. Plan for long range spotting, running surface fire, torching and potential crown runs. Poor overnight recovery will perpetuate fuel dryness. Once the inversion lifts, approximate 1000, fire activity will increase. Expect resistance to control due to weather, fuel condition and alignment.

SPECIFIC FIRE BEHAVIOR:

Branch I (Sugar)

Division B: Interior smoldering and creeping near the line. The potential for active fire behavior remains present due to the current fire environment.

Division D: Active fire behavior to include uphill runs, spotting, group torching.

Division M: very active fire behavior and potential for large fire spread. Spotting and slope reversal in the area of Frenchman Cove Rd.

Division O: Active fire behavior with surface fire, slope runs, torching and spotting near Trocci Rd. Heavy concentrations of fuel located throughout the drainage. Be mindful of wind shiftd due to topographical features.

Division Q: Potential rollout and upslope movement. SW winds will test containment lines across the face of the slope. Be aware of alignment.

Branch III (Dotta)

Division H: Open line adjacent to Horton Canyon has the potential to be affected by forecasted SW winds. Rollout can also be a contributing factor to fire spread.

Division K: Horton Ridge has an increased probability for active fire behavior due to alignment with fuel, weather and topography. Spotting potential for timber under current conditions is .2 mile.

Division E: Smoldering and creeping in the interior. Rollout into the adjacent drainage (at the DIV K/E break) could increase fire spread. Broken fuel continuity should negate any intense fire runs.

Night Division

Cooler temperatures tonight. Moderate RH recovery on ridgetops. Diurnal downslope winds. A PIG of 40% will minimize fire behavior and keep spot fires manageable.

AIR OPERATIONS

Tactical Watch Out: Being delivered by aircraft to the top of the fire.

Safety Message

Snags/ trees can burn in the upper portions. Look up! Just because there is no fire in the lower trunk does not mean it's safe.

Beckwourth Complex- Safety Message

INCIDENT #CA-PNF-001064

DATE: 07-8/9-2021 TIME: 0600-0600 Day/Night Shift

Mission Analysis and Engagement

- o What is the mission, what is the assignment?
- o Are all hazards identified and made known?
- o Is additional information needed?
- o Lookouts Communications Escape Routes Safety Zones
- Situational Awareness Perception of the elements in the environment!
 Comprehension of the situation and Projection of Future Status.

Be sure all elements of your safety plan are in place prior to engagement

Communication Responsibilities

All Firefighters have five communication responsibilities

- *Briefings All resources require briefings. Use briefing checklist in pocket guide.
- *Debrief Actions as necessary. Use pocket guide After Action Review to stimulate discussion and provide guidance.
- *Communicate Hazards to Others
- *Acknowledge messages
- *Ask if you do not know Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

Mitigate or Change Tactics When Faced With

- o Indirect Fireline
- Compromised LCES
- o Frontal Assault
- o Change in wind speed and/or direction
- o Re-burn Potential
- o Predicted Lightning
- Lack of Communications
- o Structural Protection
- Spotting Becomes Common
- o Downhill Line Construction

BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued andcomplacent. 5mph speed limit in and around ICP, keep your speed down in all areas. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	STEEP TERRAIN & ROLLING DEBRIS	Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	INDIRECT LINE CONSTRUCTION	Establish and maintain LCES. Locate line in favorable location, lighter fuels, and gentler topography when possible. Utilize natural or existing barriers.
ALL	AIR OPERATIONS	Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for factical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	ACCOUNTABILITY	 Know where your troops are at all times. Know the plan, brief the plan, and implement the plan. Ensure you have communications with adjoining forces and they know the plan. Check in and out when traveling through Branches and Divisions. If you see someone that looks out of place, stop and ask what they're doing As fire conditions escalate and your chasing spots, don't over commit.
ALL	COMMUNICATIONS	Back off, regroup, and re-engage. Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you do not know the plan. Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HEAT RELATED ILLNESS	 Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time Fallers mustbe qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Key to success in the WUI is preparation and preplanning. Be active and engage in defense preparations & do not wait for the fire to arrive. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes.
DEC	INCIDENT NAME:	OPERATIONAL PERIOD: 0600 – 0600 JULY 8/9, 2021
BEU	KWOURTH COMPLEX	Date/Time Prepared: 07/07/2021 - 0830

Fire and COVID-19 Briefing Checklist

Fully vaccinated people:

- Do not need to wear a mask or physically distance in federal buildings or on Federal lands, except where called for by Federal, State, local, tribal, or territorial laws, rules, and regulations
- Masks are required on all federally managed incidents for individuals that are not fully vaccinated. Mask wearing requirements on incidents or in federal facilities should be consistent with CDC guidance.

Self-Awareness / Screening

- ☐ Immediately separate yourself from others.
- □ Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Shortness of breath or difficulty breathing
 - o New loss of taste or smell
 - o Fever
 - o Chills
 - o Sore throat
 - o Muscle pain
- □ Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

SUPERVISOR:

Notify Medical Unit as soon as possible.

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE 'MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training

Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

			, 10 10 11 20 00/100 2/// 0////	no providing moderation.	
Severity of Eme	ergency 🗆	RED / PRIORITY 1 Life Ex: Unconscious, difficulty	or limb threatening injury of breathing, bleeding severely, 2°	r liiness. Evacuation need – 3° burns more than 4 paim size	ls IMMEDIATE as, heat stroke, disoriented.
AND	-	YELLOW / PRIORITY 2	Serious Injury or iliness. E	vacuation may be DELAYE	D if necessary.
Transport Pr	riority	Ex: Significant trauma, una	nble to walk, 2° – 3° burns not mo	re than 1-3 palm sizes.	-
(priority 1, 2		REEN / PRIORITY 3 M Ex: Sprains, strains, minor	inor injury or illness. Non-i heat-related illness.	Emergency transport

HUMAN RESOURCE MESSAGE

GIVE A HELPING HAND

PRACTICE RANDOM ACTS

OF KINDNESS!

IT WILL MAKE ANOTHER

PERSON'S DAY!

IT WILL MAKE YOUR DAY!

If your actions inspire others to dream more, learn more, do more and become more, you are a leader. — John Quincy Adams

Feel free to call/text HRSP if you have questions, concerns, or just want to chat.

Adam Alvarez - (HRSP) - (707) 373-8715

TRAINING MESSAGE

BECKWOURTH COMPLEX JULY 8, 2021

DON'T LET YOUR HARD WORK GO UNNOTICED!

If you are a trainee and have an open position task book you need to have the proper documentation for it to count.

Every task in your PTB requires three things:

- 1. An Evaluator#
- 2. A date
- 3. The Evaluator's Initials

Things to remember when having your tasks signed:

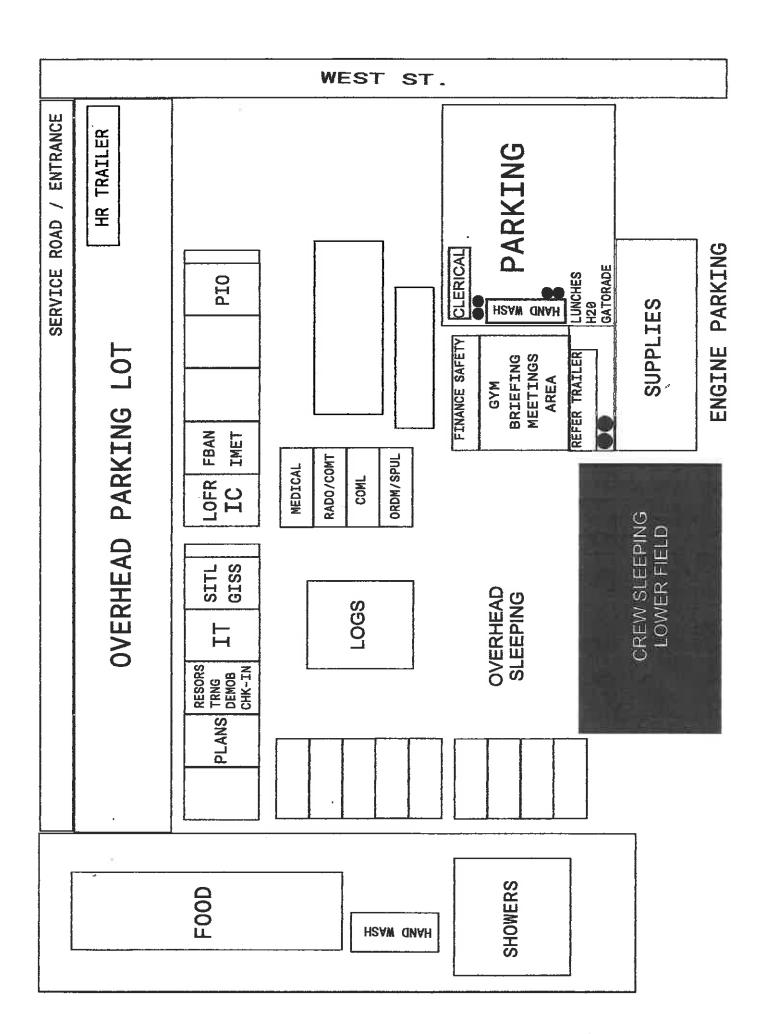

- 1. It needs to be legible
- Leave room in each task completion box for more than one signature.

If you have any questions, please feel free to call us or send us a text.

Thank You,

Emil Picchi Training Specialist 650.520.5102 TNSPEP@gmail.com
